Name: challenges

<Files\\EU- 10> - § 2 references coded [4.63% Coverage]

References 1-2 - 4.63% Coverage

<Files\\EU- 11> - § 3 references coded [2.26% Coverage]

References 1-2 - 1.63% Coverage

Reference 3 - 0.63% Coverage

¶80: So, making them aware of the issues and educate them was a more challenging compare to developing the Meditor platform

<Files\\EU- 12> - § 3 references coded [6.67% Coverage]

References 1-2 - 3.59% Coverage

Reference 3 - 3.08% Coverage

¶45: While using this app I have faced some physical and mental challenges, for example the security of my data was a big concern and I think the language is too complex for me, some simple language would be helpful in this section (app information for the usages).

<Files\\EU- 13> - § 2 references coded [4.98% Coverage]

References 1-2 - 4.98% Coverage

<Files\\EU-1> - § 4 references coded [5.77% Coverage]

References 1-2 - 3.16% Coverage

Reference 3 - 0.75% Coverage

¶52: Therefore, living situation is also a challenging issue in this domain.

Reference 4 - 1.86% Coverage

¶59: Also one major challenge is to support users with delays, for example you have register with this app for a Vaccine, but how can one use this if that person have learning delays.

<Files\\EU-2> - § 2 references coded [1.85% Coverage]

References 1-2 - 1.85% Coverage

<Files\\EU-3> - § 3 references coded [3.04% Coverage]

References 1-2 - 2.13% Coverage

Reference 3 - 0.91% Coverage

¶89: It means, one of the major challenges they have is continuing and continuous monitoring in health app development and deployment.

<Files\\EU-4> - § 2 references coded [3.47% Coverage]

References 1-2 - 3.47% Coverage

<Files\\EU-5> - § 2 references coded [4.40% Coverage]

References 1-2 - 4.40% Coverage

<Files\\EU-6> - § 4 references coded [11.73% Coverage]

References 1-2 - 4.98% Coverage

Reference 3 - 5.14% Coverage

¶39: I don't know what issue you can consider this one, may a user addition or may be a mental challenge, I mean, I feel like I miss the updated news from my friend from news agencies etc. For the health app that I use I don't fell like this may be due the interface they have or by somehow these are less interesting.

Reference 4 - 1.61% Coverage

¶67: Thus, the main challenge how to do you provide the security of the health data that are collected.

<Files\\EU-7> - § 2 references coded [3.30% Coverage]

References 1-2 - 3.30% Coverage

<Files\\EU-8> - § 4 references coded [7.85% Coverage]

References 1-2 - 3.52% Coverage

Reference 3 - 2.69% Coverage

¶44: I think this also relate to the mental challenges, because I have to keep in mind to do that, and when the app is reminding me to do that, I fell it can be done in a much better way so that the user can follow the advice willingly.

¶58: **EU-8:**

¶59: In my experience, the main challenge was how to present something to the user so that it remains information but don't frustrate them.
